Active Context:

Stripe x

+ Drop company here

I have loaded the profile for **Stripe**. What would you like to know about them? I can help you analyze their recent product launches, engineering culture, or compare them to other companies.

What are the main engineering challenges they are facing right now? I'm interviewing for a Frontend role.

MVP User Scenarios

Scenario 1: Targeted Company Questions

- User Persona: Sally, a Junior Full-Stack developer
- User Action:
 - She uses the **Research Board** to drop the Stripe company into the AI context
 - She pastes their job description for Frontend into the chat
- System:
 - System parses the text to extract core requirements
 - OpenAI API finds and analyzes recent interview questions asked by Stripe
- Outcome: Sally gets a list of technical and cultural questions specific to Stripe

Scenario 2: Resume Optimization

- User Persona: Natalie, a developer applying to multiple jobs at different companies
- User Action:
 - She uses the **Resume Editor** to **Auto-Tailor** her resume to a Backend Engineer role at Cisco
 - She looks at the **Dashboard** to check the status of her other applications
- System:
 - Open API analyzes the Cisco job description and re-words parts of her resume to be in STAR format and highlights more of her backend skills in Python and SQL
 - System tracks **Applied, Interviewing, Offer** states in Supabase database
- Outcome:
 - Natalie downloads a tailored PDF resume to be uploaded to this Cisco job application

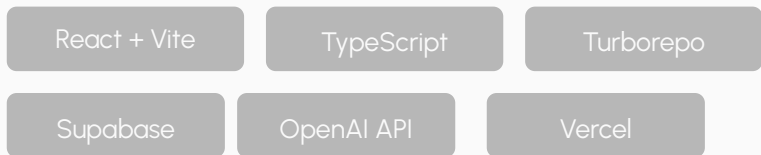

Agile Planning

Technology Stack + Architecture

High-Level System

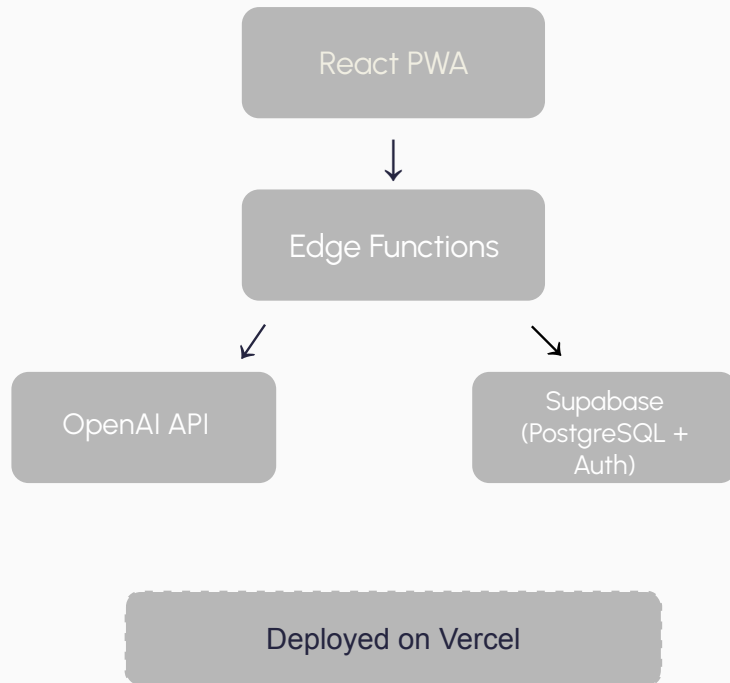

User pastes job URL → Edge Function parses & extracts requirements → OpenAI generates tailored questions → Results cached in PostgreSQL

Tech Stack

Key Technical Risks

- ⚠️ **AI Hallucinations:** Mitigate with structured prompts and validation.
- ⚠️ **Latency:** Stream responses, use loading states and caching.
- ⚠️ **URL Scraping:** Fallback to pdf parsing, multiple parsers.
